iTRACK

DATA COLLECTION WITH IPG CENTRAL HUB

Knowledge is power. When combined with the ETX tape head, IPG's iTrack™ System monitors and reports data to improve your equipment's efficiency. This versatile, adaptive system is easy to set up and works with almost all case sealing equipment. iTrack operates within its own network, while remote cellular connectivity allows users to review performance data from anywhere.

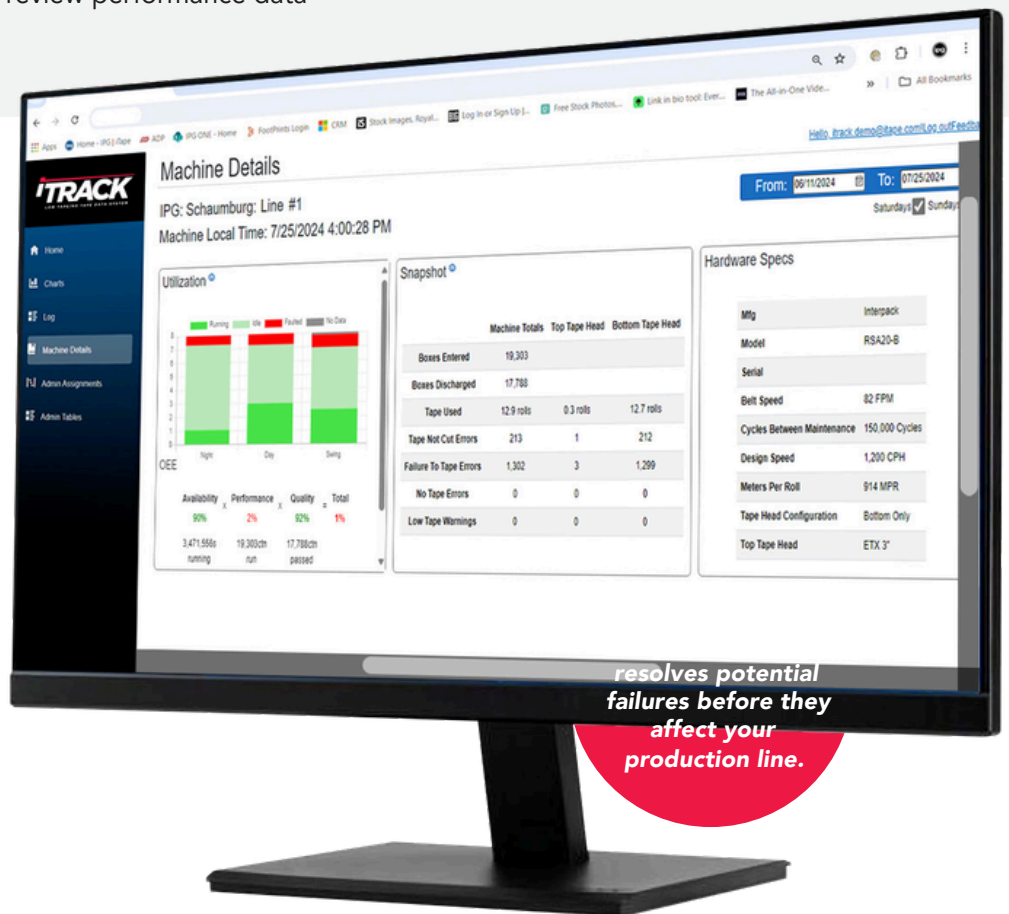

Reduces downtime **through** *web-accessible data resulting in actionable course corrections*

IPG Central Hub maximizes uptime **through** *text and email alerts*

Optimizes maintenance **schedules**

iTRACK DATA CAPTURE

- Data is viewed in a web accessible dashboard •

Auto-generated emails and text alerts

- Predictive maintenance
 - Machine health score
 - Immediate machine maintenance
 - Unexpected offline status
- Software settings adaptable to your operation
 - Data insights assist personnel in adjusting tape heads to run tape rolls down to the core

MONITORED BY IPG

- All data captured and monitored by IPG Central Hub
- Case sealer monitoring
 - Case sealer throughput monitoring
 - Up time and down time
 - Errors recorded with date stamps
 - Records total volume of tape used
 - Machine belt speed
- Low Tape / No Tape System indicates:
 - Low tape / no tape
 - Partially taped cases
 - Uncut tape & case sealer jams
- Automatically stops case sealer on errors
- Automatically shuts down case sealer during idle time:
 - Preventing excess wear
 - Reducing electrical consumption by up to 33%
