

PACKAGING DIAGNOSTICS

Is your packaging operation running at **FULL HEALTH?**

LET US GET YOU UP TO SPEED!

AF2K Testing and ETXtreme Tape Head

- Measures adhesion strength to your corrugate boxes, which could predict potential tape failures
- Proven increase in adhesion with the ET Xtreme Tape Head

Service Automation Support

- New machinery installation, operator training, machine commissioning, machine health audits, repair services
- Preventative maintenance programs

GearUp StretchWrapping Optimization

- Downgauging your stretch film to elevate your sustainability and lower your costs
- Scheduled evaluations of your pre-stretch assembly and stretch wrap equipment by our expert service team.

iTrack Data Collection System

- Case sealer monitoring (low tape/no tape, uncut tape, and case sealer jams)
- All data is monitored by a Central Hub to capture and resolve potential failures before they affect your production line.
